Integrated Quality, Occupational Risk Prevention and Environmental Policy APRIM, S.L.

APRIM S.L., has been supplying components for various sectors for more than 50 years, among which the automotive sector stands out. Our firm commitment to improving all the organisation's processes, placing the customer at the centre of all our decisions, has allowed us to count on their trust. The general lines of our commitment that we reflect here are based on assuming a sustainable development in the behavior of the organization and in order to provide a frame of reference for the establishment of objectives, we settle down the following guidelines:

1. Satisfy customer needs, strictly complying with their requirements to strengthen their confidence and surpass their expectations in terms of quality, delivery and price.
2. To offer our clients a complete service, promoting responsible and quality-conscious action through collaboration, information and transparency in subcontracted tasks throughout the supply chain.
3. Systematically pursue the elimination of errors and the reduction of variability, with a "Zero Defects" horizon and orientation.
4. Promote an efficient, adaptive, integrating and participative organization.
5. Involve, train and hold accountable the people who make up APRIM so that they respect, share and apply the Quality and Environmental Management System.
6. To provide safe and healthy working conditions for the prevention of work-related injuries and deterioration of health.
7. Eliminate hazards and reduce risks to workers' Health and Safety. In this process promote consultation and participation of workers and workers' representatives.
8. Optimize our consumption, reduce our waste and review our facilities and technologies so that our impact on the environment is as low as possible.
9. Comply with the applicable Legislation and Regulations regarding the environment and the prevention of occupational risks, being in continuous adaptation and revision of the terms that are applicable to us.
10. Commitment to environmental protection, including pollution prevention.
11. Continuously improve the effectiveness of the Quality and Environmental Management System in order to improve the overall performance of the organization.

When unifying criteria and ensuring compliance with the guidelines set out in the Quality and Environment Manual the management of APRIM, S.L. establishes an action programme, in accordance with the following points:

- Delegate to the Manager of Quality, Environment and Continuous Improvement the authority to develop necessary corective actions in terms of quality and environment.
- Delegate to the Manager of Human Resources the authority to develop necessary corrective actions in matters of prevention of labor risks.
- Allocate the necessary resources to comply with all applicable requirements.
- Establish the necessary training and information channels so that all the Company's personnel are aware of and comply with the Quality, Environmental and Occupational Risk Prevention standards.

All the considerations, procedures and systems presented in the Manual must be a faithful reflection of the real activity carried out by APRIM, S.L. Likewise, the system must be acceptable to our clients, for which all the necessary modifications must be introduced.
